

**Yellow warning
Rain**

Between
21:00 Wed 27 Sep 2023 and
06:00 Thu 28 Sep 2023

A period of heavy rain late Wednesday through to early Thursday may cause some flooding in a few places

What to expect

- Flooding of a few homes and businesses is likely.
- Some bus and train services probably affected, with journey times by road also taking longer with a chance of the odd road closure.

Further details

An area of rainfall, accompanied by very strong winds, is likely to arrive from the south on Wednesday evening with 30-50 mm, and perhaps in a few spots 60 mm, of rain building up on areas of higher ground within the warning area. Given that this is forecast to follow an already very wet period of weather which will not have had much time to dry out, as well as the fact that the strong winds could exacerbate any flooding by blocking drains and gullies with leaves and other debris, some flooding of roads and perhaps the odd property in very flood prone areas is possible. Rain should ease by early Thursday morning.

✓ Medium likelihood of low impacts
